

What's Your Vision?

The school was seeking the opportunity to upgrade their existing 10 year old LED display to one that would enhance their content capabilities to meet a more image and animation-based expectation.

Their biggest challenge, though, was sourcing the correct hardware solution from the right provider to meet their upgrade expectations for the next 10 years.

We were able to not only provide the right LED display for their content expectations, we were also able to provide a flexible communication setup via cell modem that would ensure efficient communication from one side of campus to the other and remotely.

What's Your Vision?

The existing signage had beautiful masonry that the church wanted to preserve although they were not sure it was structural.

We performed a thorough site inspection, and we were able to meet their hopes.

The existing masonry structure has been enhanced to include a dynamic, high resolution LED display allowing more versatility and eye-catching capabilities.

Education

A Digital Sign That Fits

The school was looking for a solution that the maintenance department could install themselves between existing brick columns.

Church

A Win-Win Solution

We provided a complete turnkey "win-win" solution by reusing the existing support poles which reduced overall costs.

Financial

Growth Demands Efficient Communication

GECU has experienced tremendous growth; With this success came the need for branch expansion and increased communication.

Retail

Navigated The Permit Process

The local sign ordinance had changed from their original LED display purchase and thus the ability to secure a permit was questionable.

Government

Severe Weather Conquered

Weather in Michigan is no joke, so updating from a manual board to an LED display was safe, attractive, and saved time.

Medical

When Competition Comes to Town

After years of being the only animal hospital, new construction & competition moving in forced Central Texas Animal Hospital to upgrade their communication.

Automotive

Busy Street Deserves Dynamic Advertising

Having a carwash located on a busy street, Copper Top Carwash needed an attention grabbing sign to advertise specials and draw in business.

Transportation

Cell Phone Lot Went Digital

Our experience with providing and integrating LED display hardware with Jacksonville Int'l Airport's existing content management platform solidified our ability to meet their needs.

What's Your Vision?

Silver Spur Business Park is a new multi-tenant business park with high visibility on one of the most heavily traveled roadways.

The need for an eye-catching sign was paramount to, not only identify the current tenants, but also promote the available space for lease.

Their biggest challenge was finding a partner that could help them create a sign solution that met their visual expectations, but also was knowledgeable about the local sign ordinance and could be permitted.

Our ability to understand and comply with the sign ordinance combined with our 9.9mm L Series model display capabilities and competitive price point created the comfort needed for the owners at Silver Spur Business Park to move forward.
